SUMMARY

Senior Full-Stack Engineer with 10+ years at Apple delivering high-scale enterprise analytics platforms for **60,000+ global users**. Expert in building functional, data-driven UIs using **React**, **Redux**, and **custom D3.js**. Currently developing **AI-powered** conversational tools for a 5,000-user pilot, focusing on feature delivery and security hardening.

EXPERIENCE

Apple Inc. (via VMC Soft Tech)

Apr 2017 – Present

Senior Full-Stack Engineer

AI Initiatives & Feature Development

- Developed PoC **AI assistant** integrating **LLM capabilities** for a targeted **5,000-user** internal pilot.
- Built **Java middleware layer** for real-time **LLM streaming (SSE)**, enabling a fluid conversational UI.
- Hardened for production: **RBAC**, **CSRF/SQLi prevention**, and mixed-user data protection.

Analytics Delivery & UX Evolution

- Delivers UI for analytics suite supporting **60,000+ global** Apple and vendor users.
- Spearheaded **"Report Studio"** — translating user interviews into **Drag-and-drop dashboards**.
- Owns design evolution: **requirements gathering**, **prototyping**, and mockup ownership from UX foundations.
- Custom **D3.js** and **AG Grid** visualizations enabling complex data drill-downs for global operations.

Cross-Functional Reliability & Platform Support

- Architected **Admin Health Module** monitoring **20+ KPIs** — real-time ops visibility without Splunk.
- Primary liaison across Support, **DevOps**, and Database teams for infrastructure and data integrity.
- Modernized **CSAT** platform frontend: migrated legacy code to **Vite**, **React 18**, **Redux Toolkit**.

Apple Inc. (via Galaxy i Tech) · Senior UI Developer · Jul 2015 – Mar 2017

- Delivered enterprise UI components for internal Apple tools with focus on **UX quality** and performance.
- Integrated **automated test suites** (Cypress/Playwright) to protect critical user journeys and reduce regressions.
